"<title>" should be present in all pages

- Severity set to Major

Flash animations should be embedded using the window mode

- Severity set to Minor

Links should not target "#" or "javascript:void(0)"

- Severity set to Major

"<fieldset>" tags should contain a "<legend>"

- Severity set to Minor

Sections of code should not be commented out

- Severity set to Major

JSF expressions should be syntactically valid

- Severity set to Major
- Parameter functions set to

Javascript scriptlets should not have too many lines of code

- Severity set to Major
- Parameter maxLines set to 5

Dynamic includes should not be used

- Severity set to Major

Tabulation characters should not be used

- Severity set to Minor

Files should not be too complex

- Severity set to Major
- Parameter max set to 10

JSP expressions should not be used

- Severity set to Major

Files should not have too many lines

- Severity set to Major
- Parameter maxLength set to 1000

Track uses of disallowed elements

- Severity set to Major
- Parameter elements set to

The "style" attribute should not be used

- Severity set to Major

Track lack of copyright and license headers

- Severity set to Blocker
- Parameter headerFormat set to
- Parameter isRegularExpression set to false

Using HTML comments is security-sensitive

- Severity set to Minor

Track uses of disallowed namespaces in XHTML documents

- Severity set to Major
- Parameter namespaces set to

Lines should not be too long

- Severity set to Major
- Parameter maxLength set to 120

Attributes should be quoted using double quotes rather than single ones

- Severity set to Minor

Multiple "page" directives should not be used

- Severity set to Minor

White space should be used in JSP/JSF tags

- Severity set to Minor

Disallowed "taglibs" should not be used

- Severity set to Blocker
- Parameter tagLibs set to <http://java.sun.com/jstl/sql>

Track lack of required attributes

- Severity set to Major
- Parameter attributes set to

All HTML tags should be closed

- Severity set to Minor
- Parameter ignoreTags set to HTML,HEAD,BODY,P,DT,DD,LI,OPTION,THEAD,TH,TBODY,TR,TD,TFOOT,COLGROUP,IMG,INPUT,BR,HR,FRAME,AREA,BASE,BASEFONT,COL,ISINDEX,LINK,META,PARAM

Labels should be defined in the resource bundle

- Severity set to Major
- Parameter ignoredContentRegex set to
- Parameter attributes set to outputLabel.value, outputText.value

Branches should have sufficient coverage by tests

- Severity set to Major
- Parameter minimumBranchCoverageRatio set to 65

Failed unit tests should be fixed

- Severity set to Major

Lines should have sufficient coverage by tests

- Severity set to Major
- Parameter minimumLineCoverageRatio set to 65

Skipped unit tests should be either removed or fixed

- Severity set to Major

Source files should not have any duplicated blocks

- Severity set to Major

Source files should have a sufficient density of comment lines

- Severity set to Major
- Parameter minimumCommentDensity set to 25

Tables should have headers

- Severity set to Major

"aria-label" or "aria-labelledby" attributes should be used to differentiate similar elements

- Severity set to Major

Tables used for layout should not include semantic markup

- Severity set to Critical

HTML "<table>" should not be used for layout purposes

- Severity set to Major

"<html>" element should have a language attribute

- Severity set to Major

Links with "target=_blank" are security-sensitive

- Severity set to Minor

"<object>" tags should provide an alternative content

- Severity set to Minor

Table cells should reference their headers

- Severity set to Critical
